

Environmental Policy

Saunders Havill Group believes that sound environmental management is an important component of overall management responsibility. Saunders Havill Group recognises current industry standards for environmental management and is committed to continual improvement and prevention of pollution in all of its operations.

The key objectives of our policy are to:

- promote and achieve continuous improvement of our Integrated Management System in conformance with ISO14001 to enhance environmental performance;
- establish, monitor and review measurable objectives and targets aimed at preventing pollution and minimising environmental impact;
- meet, and where practicable, exceed legal and other applicable compliance obligations;
- promote continual environmental awareness to employees through training and education so that our employees are able to carry out their duties in compliance with Saunders Havill Group's Integrated Management System;
- communicate environmental performance to both internal and external stakeholders, and respond to feedback;
- minimise environmental impacts and when practicable eliminate them altogether;
- use resources responsibly to minimise waste and maximise value to the community and future generations;
- work closely with employees, contractors, suppliers, clients and the community to develop and implement agreed environmental initiatives.

To achieve these objectives it is a requirement that all stakeholders take personal responsibility to protect and care for the environment and to act in a manner that does not place the environment at risk.

This policy will be communicated to employees and be on display at the reception area of all Saunders Havill Group offices for the information of interested parties including clients and members of the public.
